### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The closest prior art of record, U.S. 5,183,843 (Sakai et al), discloses polyamide compositions comprising an additive that can be either 1) a higher fatty acid metal salt or 2) a metal salt of an aliphatic carboxylic acid of 26-32 carbons. It is noted that the higher fatty acid metal salt 1) includes metal salts of fatty acids comprising 12-22 carbon atoms (column 6, lines 7-15). Applicants have provided evidence of unusual or unexpected results for using a metal salt of behenic acid (22 carbon atoms) as opposed to a metal salt of stearic acid (18 carbon atoms); see comparison of example 2 versus comparative example 1. Accordingly, applicants have demonstrated that not all of the higher fatty acid metal salts 1) comprising 12-22 carbon atoms disclosed by Sakai et al are equivalent. Furthermore, applicants' amendment limiting the metal salt to one having 20-24 carbon atoms serves to distinguish the present claims over the metal salts of 26-32 carbons 2) disclosed by Sakai et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ana L. Woodward whose telephone number is (571) 272-1082. The examiner can normally be reached on Monday-Friday (8:30-5:00).
